EDUCATION

University of Toronto

Bachelor of Information, Computer & Information Science

- GPA: 3.86/4.0

Toronto, ON, CA

September 2025 - May 2027

Broward College

Associate of Applied Science, Software Development

- GPA: 3.94/4.0

Florida, US

September 2022 - May 2024

WORK EXPERIENCE

S. Sutton & Associates Inc.

Junior Web Developer & IT System Administrator - Contract Part-time

- Manage hosting infrastructure end-to-end, including **GoDaddy**, DNS flow, SSL certificates, and domain administration, while maintaining **99.9% uptime**.
- Translate business requirements into technical recommendations, support **SEO** and **Google Analytics** efforts, and advise on infrastructure decisions aligned with security best practices.

Toronto, ON, CA

Jan 2026 - May 2026

HealthBridge AI

Backend Software Engineer - Contract Full-time

- Built **FastAPI** services integrated with **Keycloak** for structured authentication, supporting secure access control for **10,000+** active clinical user sessions.
- Integrated **LangChain** with **OpenAI APIs** into clinical workflows to enable **AI-assisted diagnosis** and treatment suggestions, reducing doctors' processing time by **68%**.
- Deployed containerized backend services on **AWS EC2** with **Docker** and **Uvicorn**, using **Nginx** for reverse proxying and load balancing to improve reliability under high-concurrency traffic.
- Shortened release cycles from **2+ hours** to **15 minutes** by automating **CI/CD pipelines** with **GitHub Actions**.

Remote

Jan 2025 - July 2025

Netpalm.AI

Software Developer Intern - Internship

- Built **React** and **Umi.js** features that improved user flow and reduced UI bugs, contributing to a **50% decrease** in frontend issue reports.
- Developed **Python Scrapy crawlers** to collect structured data for internal analysis, improving dataset coverage and reducing manual collection effort.
- Supported testing and validation with **Selenium** automation script, increasing regression coverage and catching UI issues earlier in the development cycle.

Remote

Oct 2024 - Feb 2025

PROJECTS

LocalYoutubeRAG - <https://github.com/Pintopie/LocalYoutubeRAG>

March 2026 - April 2026

- Built a local-first RAG app using **FastAPI** and **React Vite.js** for transcript ingestion, retrieval, and source-grounded Q&A.
- Integrated **Ollama's local LLM** with overlap-aware chunking, reducing query latency by **~60%**.

Personal Portfolio - <https://kennynguyen.ca> | <https://github.com/Pintopie/kennynguyen.ca>

March 2026 - April 2026

- Built a motion-first personal portfolio with **Next.js**, **React + TypeScript**, and **Tailwind CSS**, deployed on **Cloudflare Workers** with built-in **CI/CD** flow.
- Designed animations and staggered scroll-reveals using **Framer Motion**.

Liver Tumor Analysis - <https://github.com/Pintopie/Liver-Tumor-ML>

Jul 2023 - Aug 2023

- Built an end-to-end **machine learning pipeline** for **liver tumor analysis** using **NIfTI medical imaging** data, supporting preprocessing, visualization, and model training on volumetric scan inputs.
