

Kenny Nguyen

Toronto, ON | (647) 674-4333 | hoangnhan20192@gmail.com | github.com/Pintopie | linkedin.com/in/kennynygdev-ca | kennynnguyen.ca

AI and backend engineer focused on production reliability, workflow automation, and merchant-facing software.

EDUCATION

University of Toronto — Bachelor of Information, Sep 2025 - May 2027 · GPA 3.86/4.0 · Dean's List Fall 2025

Broward College — Associate of Applied Science in Software Development, Sep 2022 - May 2024 · GPA 3.94/4.0 · Dean's List Fall & Winter 2023

EXPERIENCE

HealthBridgeAI — Backend Software Engineer, Contract Jan 2025 - Jul 2025

- Built FastAPI services with Keycloak/JWT auth for an AI clinical assistant, improving access control reliability for clinical users and supporting 10,000+ active users/sessions.
- Integrated LangChain and OpenAI workflows to automate diagnosis and clinical summaries, cutting processing time by 68% for doctors.
- Deployed Docker and Uvicorn backend services with GitHub Actions CI/CD, stabilizing high-concurrency traffic and shortening releases from 2+ hours to under 15 minutes.

S. Sutton & Associates Inc. — Junior Web Developer & IT System Administrator, Contract Jan 2026 - May 2026

- Led responsive redesigns and content updates across core pages to improve mobile usability, site structure, and user experience.
- Managed GoDaddy, DNS, SSL, and domain operations while building monitoring workflows that maintained 99.99% uptime and cut 10 hours/week of manual troubleshooting.
- Ran SEO and Google Analytics audits that contributed to 102% organic traffic growth.

PROJECTS

AI Clinical Assistant “JarvisMD” — HealthBridge AI Nov 2024 - Apr 2025

- Contributed to an enterprise AI clinical assistant that ingested clinician audio, automated transcription, and generated structured summaries and follow-up recommendations.
- Built Python health checks and a Zulip bot to keep the platform resilient, supporting 10,000 concurrent users, a 40,000-session concurrency room, and 99.9% uptime.

LocalYoutubeRAG — GitHub Aug 2024 - Mar 2025

- Built a local-first RAG app with FastAPI and React/Vite for transcript ingestion, retrieval, and source-grounded Q&A across long-form videos.
- Integrated Ollama for on-device inference and overlap-aware chunking, reducing query latency by ~40-60% while keeping data local.

SKILLS

Backend: Python, FastAPI, Docker, Uvicorn, Nginx, Keycloak, GitHub Actions · **AI:** LangChain, OpenAI, Ollama, Scrapy, Selenium · **Frontend:** React, React/Vite, Umi.js, Node.js · **Data/Tools:** SQL, MongoDB, Git, Figma
